

GLMall

The Decentralized E-Commerce Revolution

What is needed to bridge **Web 2 & Web 3** E-Commerce?

The current challenges in **Decentralized E-Commerce**

High Transaction Fees

Most of today's crypto tokens and blockchains charge significant transaction fees making the use of crypto in small and split transactions highly ineffective.

Slow Transactions

Transactions generally take very long for small value transactions and do not allow split transactions between multiple participants within one transaction.

Insufficient Infrastructure

Lack of online platforms providing the needed infrastructure for crypto transactions, social interactions and smart contracts on a free, fast & secure blockchain.

The solution for **De-Commerce**

What makes GLMall so unique?

100% Free

Buying products in crypto with no transaction or gas fees, making decentralized e-commerce effective and viable for buyers.

Fast & Secure

Unique Proof-of-Trust consensus algorithm, immune to 51% attacks. Secure Escrow wallet to publicly store funds until order delivery.

Flexible

Fast fund distribution via the blockchain to merchants, partners, influencers, sales agents, etc., making instant split transactions more efficient than ever.

Inclusive

Capturing millions of previously unbanked people on one marketplace to actively participate in daily decentralized e-commerce across the globe.

The GMB/GMBT Parallel Coin System

Acquisition of USDT or GMBT

- 1 USDT / USDC is bought on any exchange and swapped to GMBT OR GMBT is purchased directly on GLMall with Fiat.

Swap into the Parallel Coin System

- 2 If purchased on the exchange, USDT / USDC is swapped into GMBT and USDT / USDC will automatically be locked out of liquidity into escrow for future re-swap.

Use of the Parallel Coin System (GMBT)

- 3 GMBT is used by buyers to purchase goods on the GLMall marketplace without any transaction fees until they are swapped back out into USDT / USDC

End of PCS Cycle

- 4 GMBT gets swapped back into the USDT / USDC chain at a future point in time to be freely traded on the market.

Re-entry into the PCS Cycle

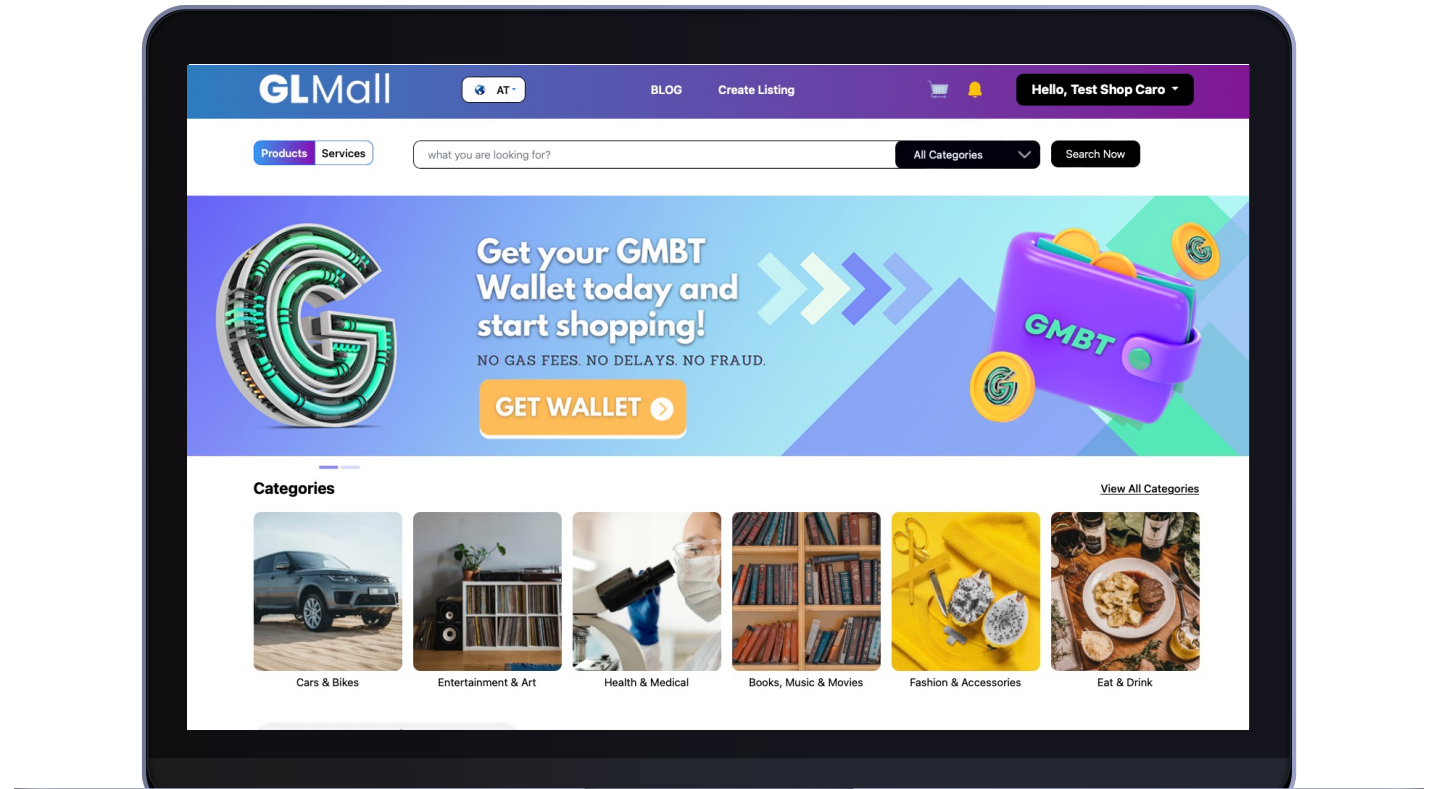

- 5 Any USDT / USDC active on the ETH Chain can be re-swapped into the GMBT for another cycle in the parallel coin system.

The GLMall Marketplace

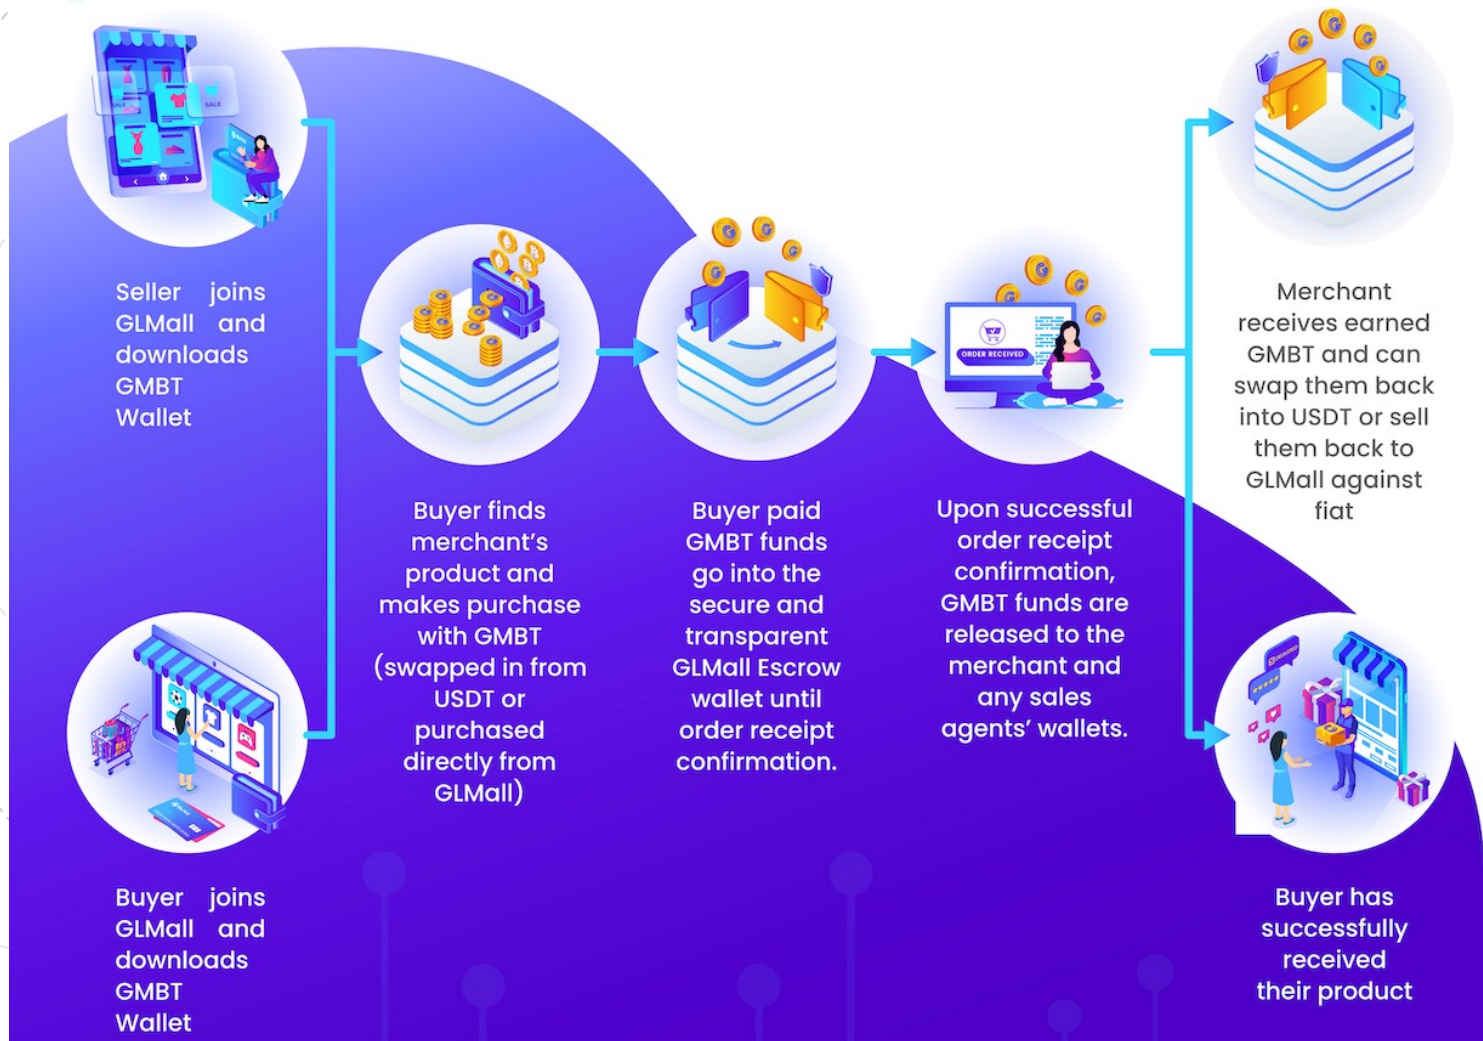

Sell your Products & Services on the Blockchain.

- Creation of native shops & Integration of external online shops (WooCommerce, Shopify, etc.)
- Free & fast e-commerce in crypto through the POT Skyfiber blockchain
- Seller Certification & Product Verification through GLMall
- Decentralized yet safe fund storage until product receipt is confirmed

GLMall Purchase Flow

Key Benefits

GLMall Sellers

01

Flexibility for your customers

By selling on GLMall, merchants offer their buyers innovative crypto payment options aside of all standard payment options such as credit card or wire transfer. This expands your customer pool and in turn boosts sales of your shop.

02

Get paid out as YOU like!

Sales generated through GLMall can be paid out in crypto or in fiat, depending on what the merchant prefers. Regardless of how customers pay for the product, merchants will get paid out in their preferred for of payment.

03

No chargebacks

GLMall uses a unique fiat to crypto onramp which delivers crypto coins against fiat payment, which are then used to place the order all in one step limiting chargebacks significantly. Refunds can be given in GMBT directly into the buyer's wallet.

GLMall Buyers

01

Payment Flexibility in Fiat and Crypto

Buyers can purchase the coin against fiat, crypto or bank transfer, and transact unlimited on the marketplace. GLMall also provides safe shopping with over 150 other crypto currencies directly on the platform.

02

Discounts & refunds directly to your Wallet

Signing up for your GMBT wallet allows you to receive discounts for your favorite shops and receive refunds in form of GMBT, which can be used for future purchases on the marketplace.

03

Secure & traceable transactions

GLMall is built on the unique Skyfiber blockchain technology providing faster and more secure transactions than any other. All payments made on the marketplace are held in a public escrow wallet until the buyer confirm successful delivery of the product.

The **3 Types** of GLMall **Merchants**

01

Native GLMall Merchants

These type of merchants create and operate an online shop exclusively on GLMall and use the platform's native or integrated crypto payment solutions to sell products & services directly on the marketplace.

02

Integrated Merchants

These type of merchants integrate their WooCommerce or Shopify online shop through a plug-in, mirroring their external online shop onto GLMall to sell in crypto, or to link back to WooCommerce to sell in fiat.

03

Customized Enterprise Merchants

These types of merchants can either be native or integrated but are considered enterprise merchants who can sell products in fiat and crypto on GLMall while choosing how to get paid out in crypto or fiat based on their special seller agreement terms.

GLMall **Merchant Subscription** Packages

GLMall offers three subscriptions to its merchants based on size and product listing volume. *

**Excludes Shopify Stores*

Start-Up

Free

Merchant Online Store

Set-up your online store fast and easy!

Merchants can set up a store directly on GLMall through the "start selling" feature OR seamlessly integrate their existing Shopify or WooCommerce into the marketplace by downloading a simple plug in. Products, pricing and orders will automatically be synced.

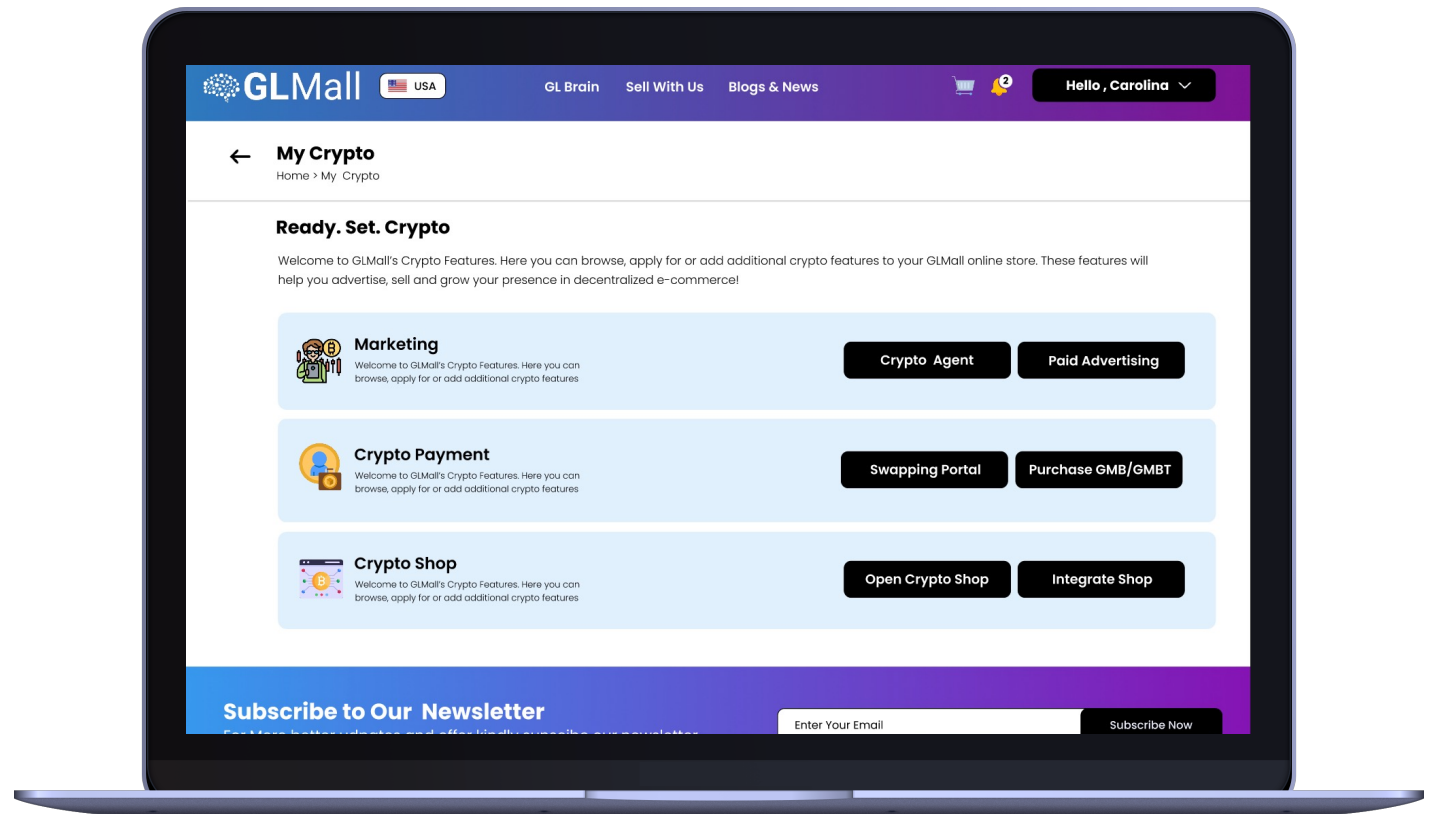

Crypto Features

Advertise, Purchase and Sell on the blockchain

GLMall leverages its innovative blockchain technology to provide features such as paid advertising and commission payments to sales agents and influencers directly at time of sale through the blockchain.

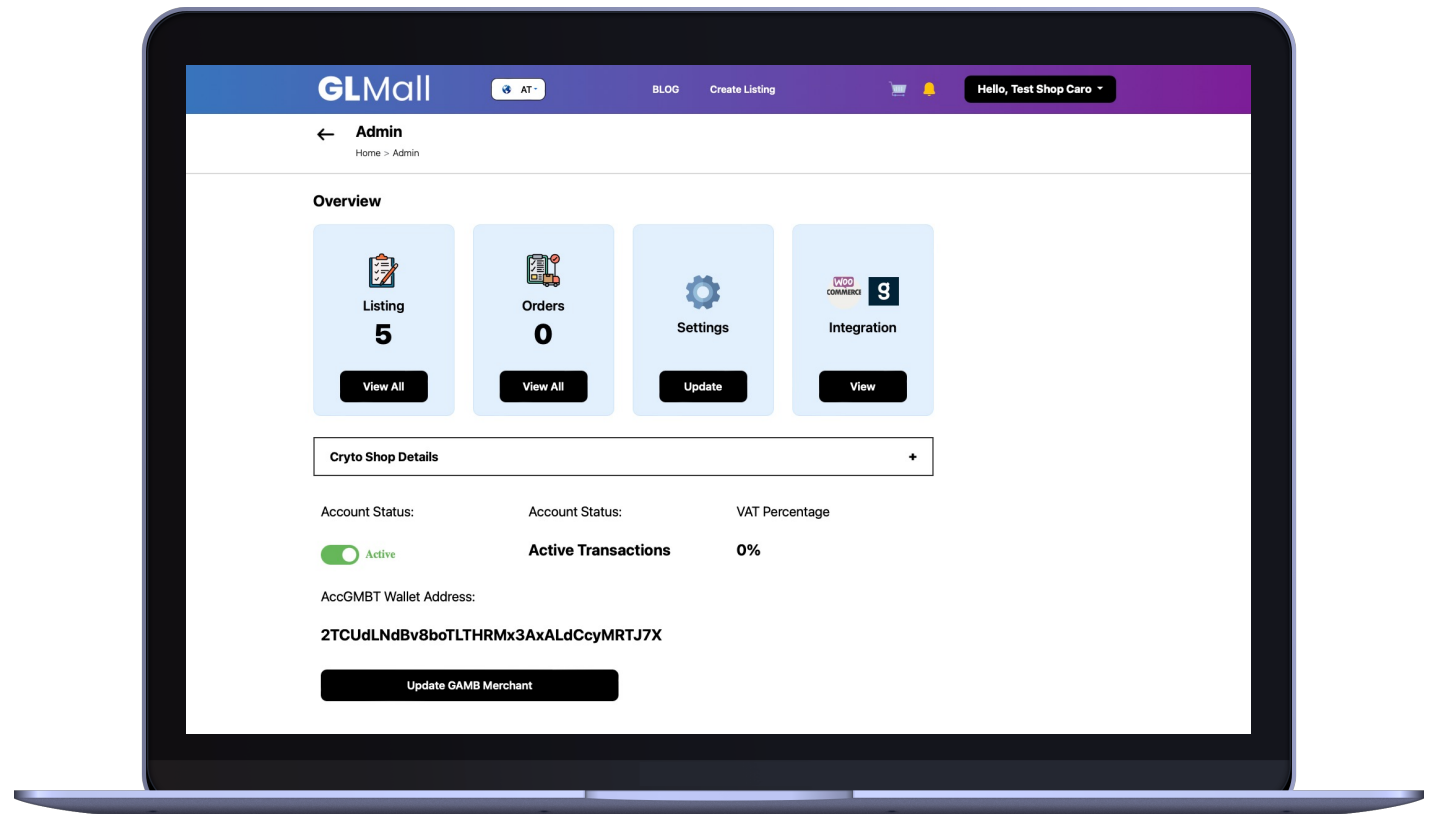

Order Tracking & Admin

Integrated order tracking and communication

Buyers and sellers , confirm, track & manage their crypto orders directly from their GLMall profile. Asking product questions, tracking your order or requesting a refund can be done directly in a buyer's /seller's online profile.

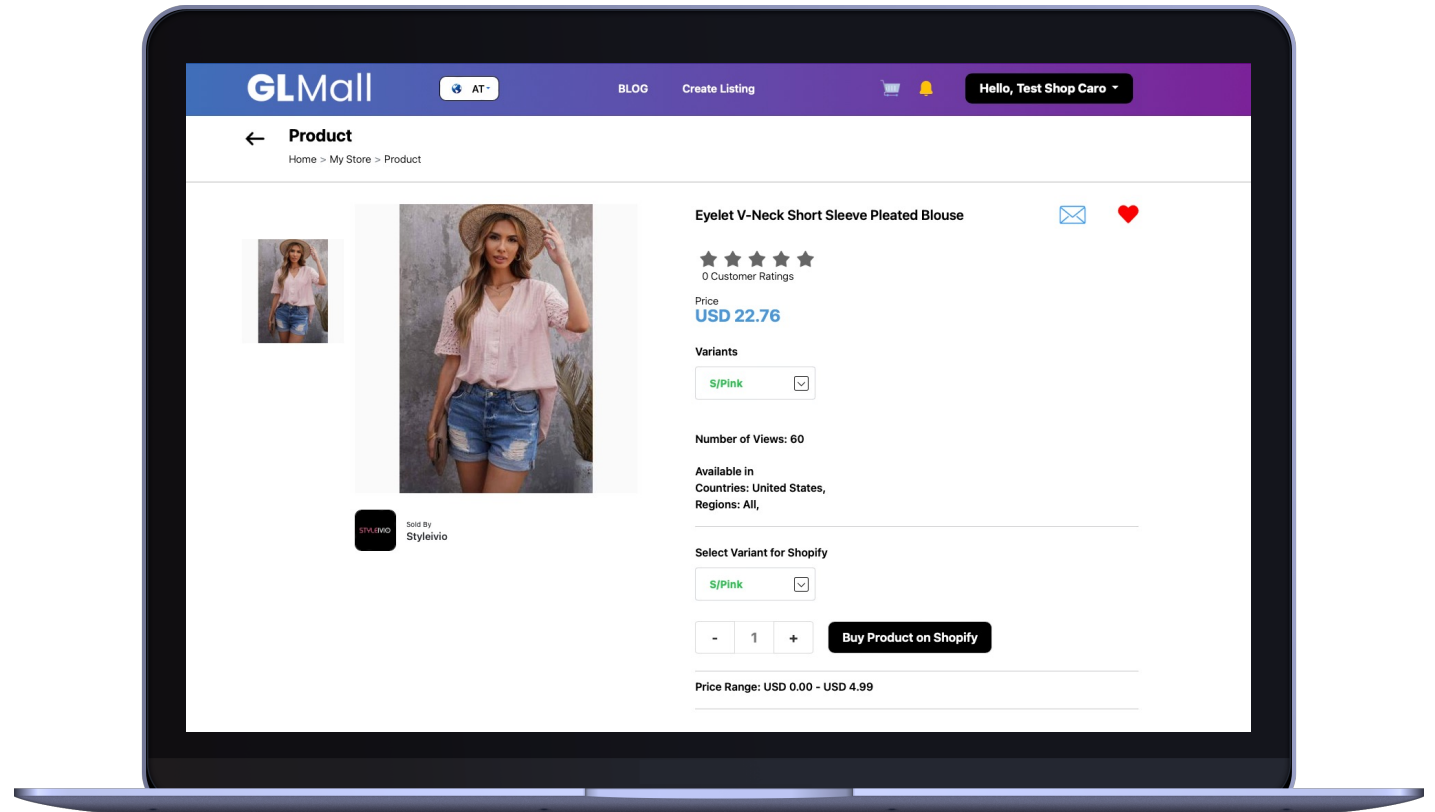

Marketing & Crypto Collabs

Market products & earn commission directly into your wallet

This is the future of influencer marketing as it allows sales agents and influencers to select, display and advertise their favorite GLMall products on their profile while automatically earning their commission on each sale in real time.

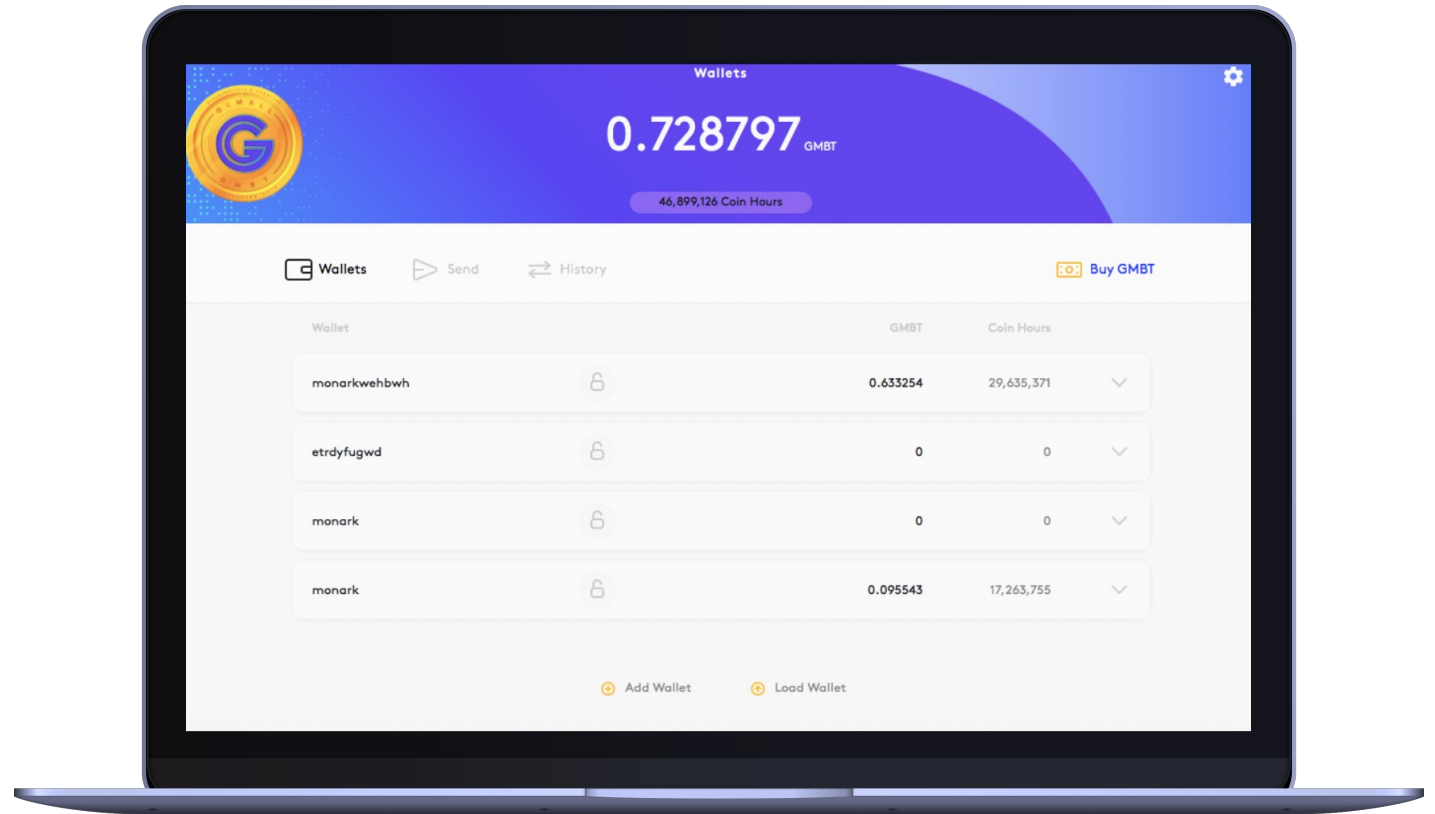

GLMall integrated cold wallet

**Safe and secure transactions
with your GMBT wallet**

With our integrated GMBT cold wallet solutions, making and receiving payments as well as handling refunds is smooth and automated via the blockchain.

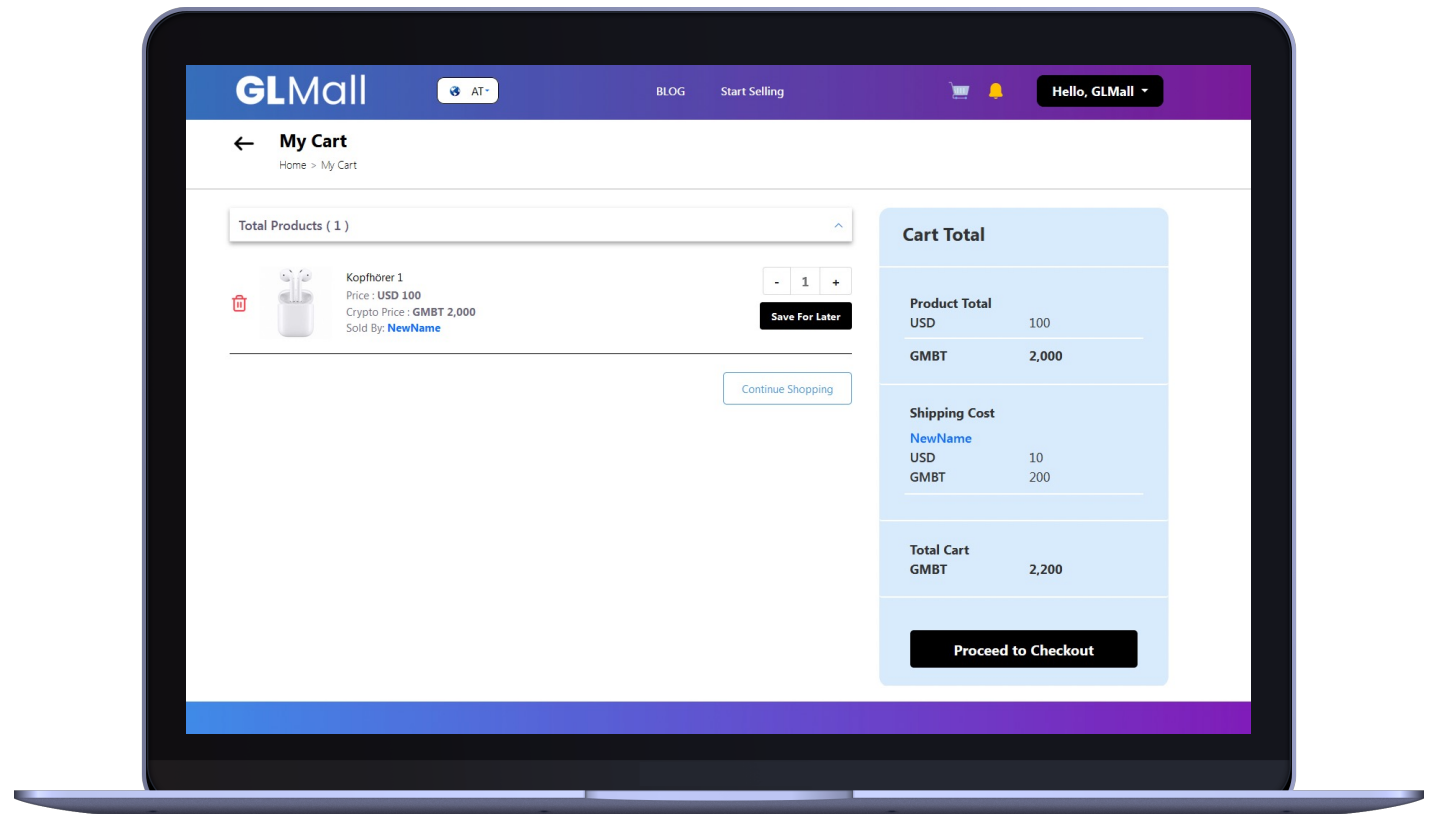

Crypto Cart & Payment options

Native & Integrated Crypto Payment solutions

GLMall offers a native wallet & crypto currency solution with 0% transactions fees. Alongside this, GLMall also integrates other payment providers allowing payment in other major crypto currencies and specific fiat to crypto on-ramps.

GLHelp Donations System

A blockchain-based donation system integrating GLBrain and GLMall platforms to connect donors with verified beneficiaries through trusted help organizations.

Beneficiaries

People in need create help requests

Help Organizations

Verify beneficiaries and approve requests

Donors

Find approved help requests

Help Providers

Deliver products and services

GLMall Development Roadmap

Q1 2024: Platform Launch

Core marketplace functionality and basic merchant tools released.

Q2 2024: Integrated Cold Wallet and Parallel Token solution on Skyfiber Blockchain

Secure crypto storage with seamless marketplace integration.

Q3 2024: Merchant Integrations

WooCommerce and Shopify plugins for existing online stores.

Q4 2024: Global Expansion

Multi-language support and international merchant onboarding.

Q1 2025: Enterprise Solutions

Custom payment infrastructure for large-scale merchants.

Q2 2025: NGO Usecase

Integration of a secure system for sending donations

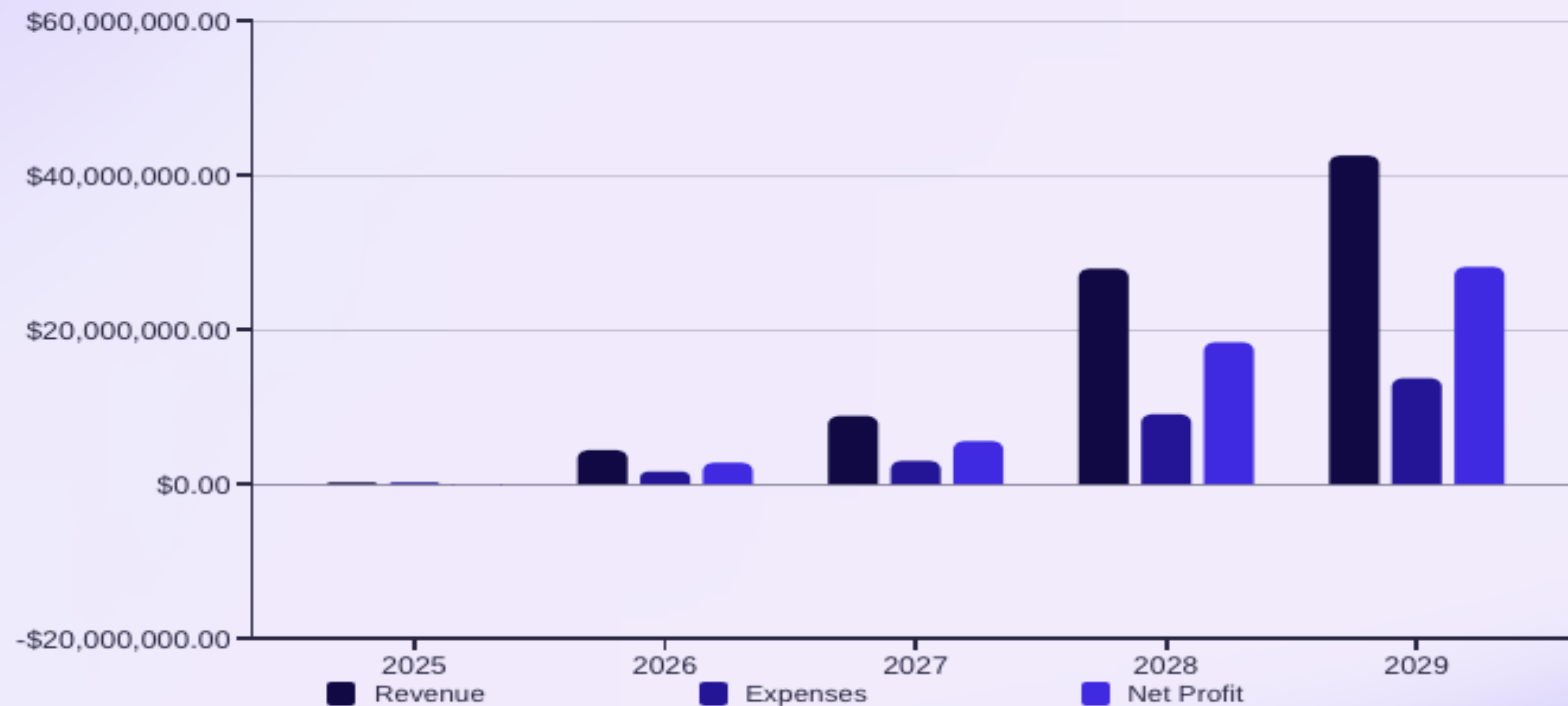

Q3 2025: ICO of the own parallel token

ICO of our own parallel token to replace USDD / USDC

GLMall Financial Projections 2025-2029

GLMall's financial trajectory shows exponential growth over the five-year period, with revenue and profitability accelerating significantly after 2026.

After an initial investment year in 2025, GLMall achieves profitability in 2026 with €2.7M net revenue. By 2029, projections show €28.2M in profit, demonstrating the scalability of our Web3 e-commerce solution. Investment of 2 Million € is needed based on a proposed evaluation of € 20.Million
